Dear Ms. Michele Hansarick,

This letter is to ask you to support SB 226. My daughter Christine Bisch suffers from a Mental Disorder, Although she get treatment every time she has an episode she is never in the hospital long enough to have a complete or lasting recovery. To find the right medicine that will work for her takes time. She is allowed to leave the hospital or the Behavior Health facility after a couple of days only to be back in again after a short period of time. I believe this legislation will help her and many others who suffer with Mental Illness.

Thank you, Bernadette Dyer
