

PHC4 Reports

The **Hospital Performance Report**, a report on the quality of hospital services, includes hospital-specific information about patients admitted for common medical procedures and treatments. Included are risk-adjusted measures of mortality, average lengths of hospitalization, length of stay outlier rates and ratings, readmission ratings for any reason and for complication/infection, and regionally adjusted average hospital charges.

The **Hospital-acquired Infections in Pennsylvania** report includes information on infections that patients contracted while in the hospital. The number and rate of infections that occurred during calendar year 2006 are reported for each of Pennsylvania's 165 general acute care hospitals.

The **Hospital Financial Analysis** is an annual report on the financial health of Pennsylvania's hospitals and surgery centers, including net patient revenue, total and operating margins and other aggregate data.

Cardiac Surgery in Pennsylvania examines the results of coronary artery bypass graft (CABG) and/or valve surgeries performed by Pennsylvania hospitals and cardiac surgeons.

Measuring the Quality of Pennsylvania's HMOs combines a broad mix of clinical results, preventive measures and member satisfaction information to give purchasers, policymakers and consumers a more complete picture of how well HMOs serve their members.

Measuring the Quality of Pennsylvania's MEDICARE HMOs combines a broad mix of clinical results, preventive measures and member satisfaction information to give purchasers, policymakers and consumers a more complete picture of how well HMOs serve their members.

The **Total Hip and Knee Replacements** report examines the results for hospitals and orthopaedic surgeons of the 9,769 total hip replacements and 19,941 knee replacements performed in Pennsylvania during fiscal year 2002.
